Précis of the Lectures on Architecture, Volume One

73 Preface

77 Introduction

Part I. Elements of Buildings
89 Section One. Qualities of Materials
97 Section Two. Uses of Materials
108 Section Three. Forms and Proportions

Part II. Composition in General
119 Section One. Combination of the Elements
122 Section Two. The Parts of Buildings
126 Section Three. Buildings as a Whole

Précis of the Lectures on Architecture, Volume Two

131 Preliminary Discourse

Part III. Examination of the Principal Kinds of Building
143 Section One. The Principal Parts of Cities
143 The Approaches to Cities
144 Tombs
144 City Gates
144 Triumphal Arches

The Parts of Cities That Communicate between All the Others
145 Streets
145 Bridges
146 Public Squares
Section Two. Public Buildings

Temple  
Palaces  
Public Treasuries  
Courthouses  
Justices of the Peace  
Town and City Halls  
Colleges  
Buildings for Assemblies of Scholars, and So On

Libraries  
Museums  
Observatories  
Lighthouses  
Market Halls and Marketplaces

Slaughterhouses  
Bourses  
Customhouses  
Fairgrounds  
Theaters  
Baths  
Hospitals  
Prisons  
Barracks

Section Three. Private Buildings

Private Buildings  
Private Town Houses  
General Dispositions of Town Houses  
Divisions of Different Blocks

Apartments  
The Dependencies of Apartments  
Kitchens  
Pantries  
Stables  
Carriage Houses

Irregular Plots  
Tenements  
Country Houses  
Farmhouses or Rustic Houses

Inns  
The Procedure to Be Followed in the Composition of Any Project
Graphic Portion of the Lectures on Architecture

185 How to Acquire in a Short Time True Architectural Talents

187 Summary of the Portion of the Oral Lectures relative to the
Graphic Work

187 Lecture One. General Ideas
188 The Way to Represent One's Ideas in Architecture to Oneself
and to Communicate Them to Others

188 Lecture Two. The Elements of a Building
189 Walls, Piers, String Courses, and Various Kinds of Opening

189 Lecture Three
189 Detached Supports, and the Horizontal Members That
Connect Them

190 Lecture Four
190 Floors and Roofs

190 Lecture Five
190 Vaults
191 How to Draw Caissons

192 Lecture Six
192 General Combinations of the Elements

192 Lecture Seven
192 Composition of the Parts of Buildings by Combining Their
Elements

194 Lecture Eight
194 Composition of the Ensemble of a Building by Combining
Its Parts
195 Method to Be Adopted When Composing or Copying
— Ensembles of Buildings Formed by Combining Rooms
Five Interaxes Wide
— Ensembles of Buildings Formed by Combining Galleries
Five Interaxes Wide
— Ensembles of Buildings Formed by Combining Rooms and
Galleries Five Interaxes Wide
— Combinations of Rooms and Galleries of Which It Is
Desired to Increase the Width by Two Interaxes in
the Center and at the Corners, without Changing the
System That Prevails in the Rest of the Ensemble
Ensembles of Buildings Formed by Combining Rooms and Galleries, Some of Which Are Five and Some Seven Interaxes Wide  

Ensembles Formed by Combining Rooms Five and Seven Interaxes Wide with Large Semicircular Rooms  

Combinations of Rooms Five and Seven Interaxes Wide with Central Rooms on Which They Abut  

Graphic Formula Applicable to Vaulted Public Buildings, All of Whose Parts Are Intended for the Same or Analogous Uses  

Application of This Formula  

Graphic Formula Applicable to Private Buildings, Two Stories High, Spanned by Floorings and Roofs, and with Stories Two Interaxes High  

Graphic Formula Applicable to Public and Private Buildings, Several Stories High, Spanned by Floorings and Roofs, and with Stories Three or Four and a Half Interaxes High  

Applications of the Former  

Applications of the Latter  

Assemblages of Porticoes, One Interaxis Wide, with Rooms Three and Five Interaxes Wide  

Assemblages of Porticoes and Rooms, Two Interaxes Wide, with Rooms Five Interaxes Wide and Courtyards, All Three Interaxes High  

Assemblages of Porticoes and Rooms Three Interaxes in Width and in Height, with Rooms of Five Interaxes and with Courtyards  

Other Combinations of the Same, with Rooms of Fifteen Interaxes Span, Reduced to Nine by Means of Porticoes Running around the Inside Walls  

Magnificent Ensembles Formed, Not by Parts of Buildings, but by Buildings Themselves, Variously Combined
