

So many people have been tossed into the void. Others believe that they are immune to catastrophe and tempt fate by peering over the edge. They're gone too. The desire to leap when everyone else has already leapt is a terrible compulsion. There is no bottom.

It is all a matter of tunnel vision. If you become fixated you'll trip and fall.

Don't discard your social responsibility.

Vast numbers of people are being vanished into a cruel system of the unchecked and the unbalanced.

Jump through the hoop and you will be set free.

I see a light at the other end. Shine!

You need charisma and a solid belief in your own capacity to perform your life with great dignity and fun.

SLIPPING
INTO
SOMETHING
MORE

a fotonovela by
Harry Gamboa Jr.
in collaboration with the
J. Paul Getty Museum

What is the ratio of survival among the fittest vs. imagined stereotypes?

The string theory of DNA is getting thinner all the time.

You can store all knowledge alongside your genetic code. Don't cheat.

Entire populations can be rendered into harmless masses of mindless flesh. Read a book. Exercise.

Avoid nothingness.

Play in the streets and win.

Look! Antarctica is cracking apart. We are the tip of the iceberg. Break the ICE. Smash it into pieces and make it melt into nonhistory. So many people are being pushed into the perpetually redundant hole of having nothing to say.

I know how to filter out all the omissions to reveal the errors. Reverse engineer time and space.
