

International Terminology Working Group meeting: *Overview of selected translation issues*

8 January 2013

Dutch translation

Rijksbureau voor Kunsthistorische Documentatie

Example new Dutch Concept in AAT

Concept: **bekerschroeven** (edelsmeedwerk) = glass holders (plate)

preferred parent: [plate](#) (object genre)

non-preferred parent: [silverware](#)

scope note:

A glass holder is a foot and stem onto which a glass can be firmly clamped. They were made as prestige objects to adorn the table. In the 15th century glass holders were often commissioned by city councils and aristocrats. By the 17th century, wealthy burghers had acquired a taste for these objects, although the fashion declined after 1650. Most glass holders were made of bronze, silver or silver gilt. They were always sumptuously decorated. The clamps often formed a human figure, a sea-horse or an animal head.

nal head.

Example 2 new Dutch Concept in AAT

2. Schutterstukken

<paintings by subject type>

scope note:

A 'schuttersstuk' (militia painting) or 'doelenstuk' ('doelen' is Dutch for the shooting range where archers or riflemen practiced). It is a painted group portrait of members of the militia. The genre was practiced exclusively in the Netherlands of the 16th and 17th century. The most famous example is painted by Rembrandt van Rijn, known as 'The Night watch'.

Record

aventurine (quartz) (quartz (mineral), mineral, ... Materials (Hierarchy Name))

Note: A quartz mineral that contains shiny flecks of mica. Aventurine is usually green but can also be reddish-brown. It is sometimes used as an inexpensive alternative to jade. Most aventurine comes from India, and Brazil. A synthetic imitation, "aventurine glass," is used for costume jewelry under the name "goldstone." Aventurine is also sometimes incorrectly called "Chinese jade" or "Indian jade."

Terms:

Term Mapping Type

Code	對應類型Mapping Type		適用情況Definition
=EQ	精準等同 【=】 Exact, simple equivalence		The concepts of the two terms are exactly the same.
~EQ	近似等同 【><】 Inexact simple equivalence		The concepts of the two terms are not exactly the same. These concepts are equivalent in certain contexts while not in others, or these concepts might overlap in scope or are slightly different from each other in connotation.
EQ+	交集等同 【一對多】 Intersecting compound equivalence		The concepts of the two terms can be represented as two or more intersecting compound sets.
EQ	聯集等同 【一對多】 Cumulative compound equivalence		The concept of one term is equal to the sum of the (two) concepts of another term.
BM	狹廣對應 【<】 Hierarchical mapping (narrower to broader)		The concepts of the two terms are in a narrower-to-broader hierarchical relationship.
NM	廣狹對應 【>】 Hierarchical mapping (broader to narrower)		The concepts of the two terms are in a broader-to-narrower hierarchical relationship.
RM	關聯對應 Associative mapping		The concepts of the two terms are neither equivalent nor hierarchically related, but are associative semantically to a certain degree.

Analysis and suggestion for mapping :

Liuqing is a technique of bamboo carving, and bas-relief is a sculpture technique not limited to a certain kind of material, so it is suggested to place Liuqing under bas-relief.

bas-relief (sculpture technique)淺浮雕

Scope Note : Sculptural relief technique in which the projection of the forms is relatively shallow.(雕塑浮雕技巧，凸起的浮雕外形相當淺)

留青(liu qing) :

1.留青陽文(liu qing yang wen) , 簡稱留青。是雕竹的特有技法之一(a technique specific to bamboo carving)。製作留青陽文時，須留下青筠，將紋飾所不需要的青筠刮除，根據青筠的多寡，以求深淺濃淡變化。該技法在唐朝已有，遲至晚明的竹工‘張希黃’才將其發揚光大。

來源：新辭典(民78)。台北市三民書局。P.1345

2.留青竹刻(liu qing zhu ke) , 竹刻一種。留青，是留用竹子表面的一層青筠(a technique that carves on the outer layer of green skin on the surface of bamboo)。作為雕刻圖紋；然後鏟去竹文以外的竹青，露出下面的竹肌做地。故名‘留青竹刻’，因留青，是留其表皮一層，所以又名‘皮雕’。竹刻留青之法，至明末張希黃時已大備。

MACE TAXONOMY

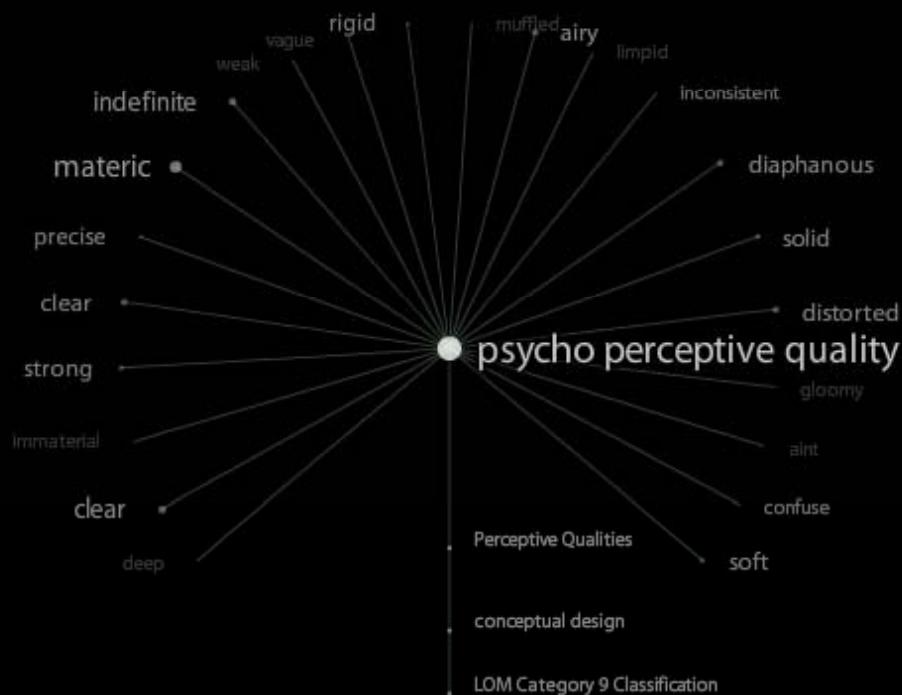

A new reading of the painting *Chess* (1931) by Paul Klee inspired the student's creation of an abstract sculpture.

It was based on the opposition between a series of free axes inside a regular and heavy grid, creating an overall articulated shape, which in turn was used as a metadesign. In the passage from the metadesign to the final architectural project, the student referred to examples of existing architecture with the same characteristics as her metadesign, including the psycho-perceptive quality "heavy," the expression form "modular, regular," the project action "decomposing," and the form composition concept "articulation."

The International Building Expo in 1993 for the first time shows and compares different experiences linked together by the theme of transparency and the relationship to the built and natural environment. Emphasizing a more modern language based on an awareness of energy aspects and the preservation of environmental resources rather than features.

Designs become design arguments - coated iron, photovoltaic metal, copper, light alloys, timber, stone, brick, ceramics and glass go through a process of transformation.

Façade is influenced by materials, the aesthetic code of a building is conditioned by the physical and structural characteristics of its components - the building system is no longer an independent variable - research on language relates the most new possibilities - synthesis - complex analyzing them.

They often the redundancy of traditional materials builds a bridge between past and present - by adding a point of addition to the present-day evolution of building techniques.

Materials - whether they are transparent to light, semi-transparent or translucent - make a dialogue with natural and artificial light making what used to be less rapidly discernible in the shadows produced by natural light - completely visible - thus changing the name of the relationship and endowing the building with a new identity - lightness density.

Deutsches Übersetzungsprojekt

German translation

In German we differentiate between:
Skulptur (a „Skulptur“ is made in a subtractive way)
Plastik (a „Plastik“ is made in an additive way)

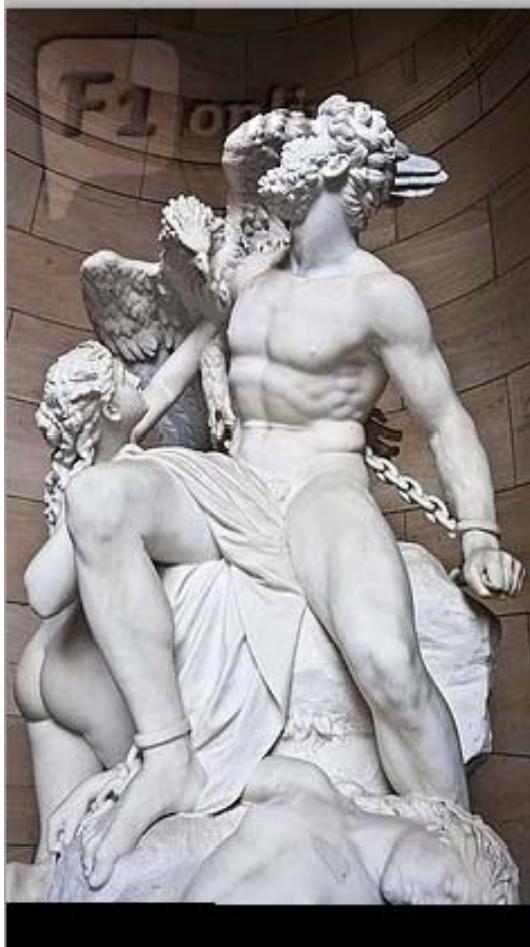

How to represent this in the AAT?

Institut für
Museumsforschung
Staatliche Museen zu Berlin

Art and Architecture Thesaurus

Deutsches Übersetzungsprojekt

Los Angeles, ITWG - January 2013

Should also regional objects be included in the AAT:

- **Kloat** (disc like sports and athletic equipment used in Northern Germany since the 17th century)

What about:

- **Zinnfiguren?** (small figures used to model battles, marching bands, etc., in past time also used as toys for children)

In the AAT we find:
pipes (Smoking equipment)
and under „pipes“
there is only „calumets“

would „president pipes“ (= Sklavenpfeife,
Negerpfeife,...) also have to go under pipes (Smoking
equipment)?

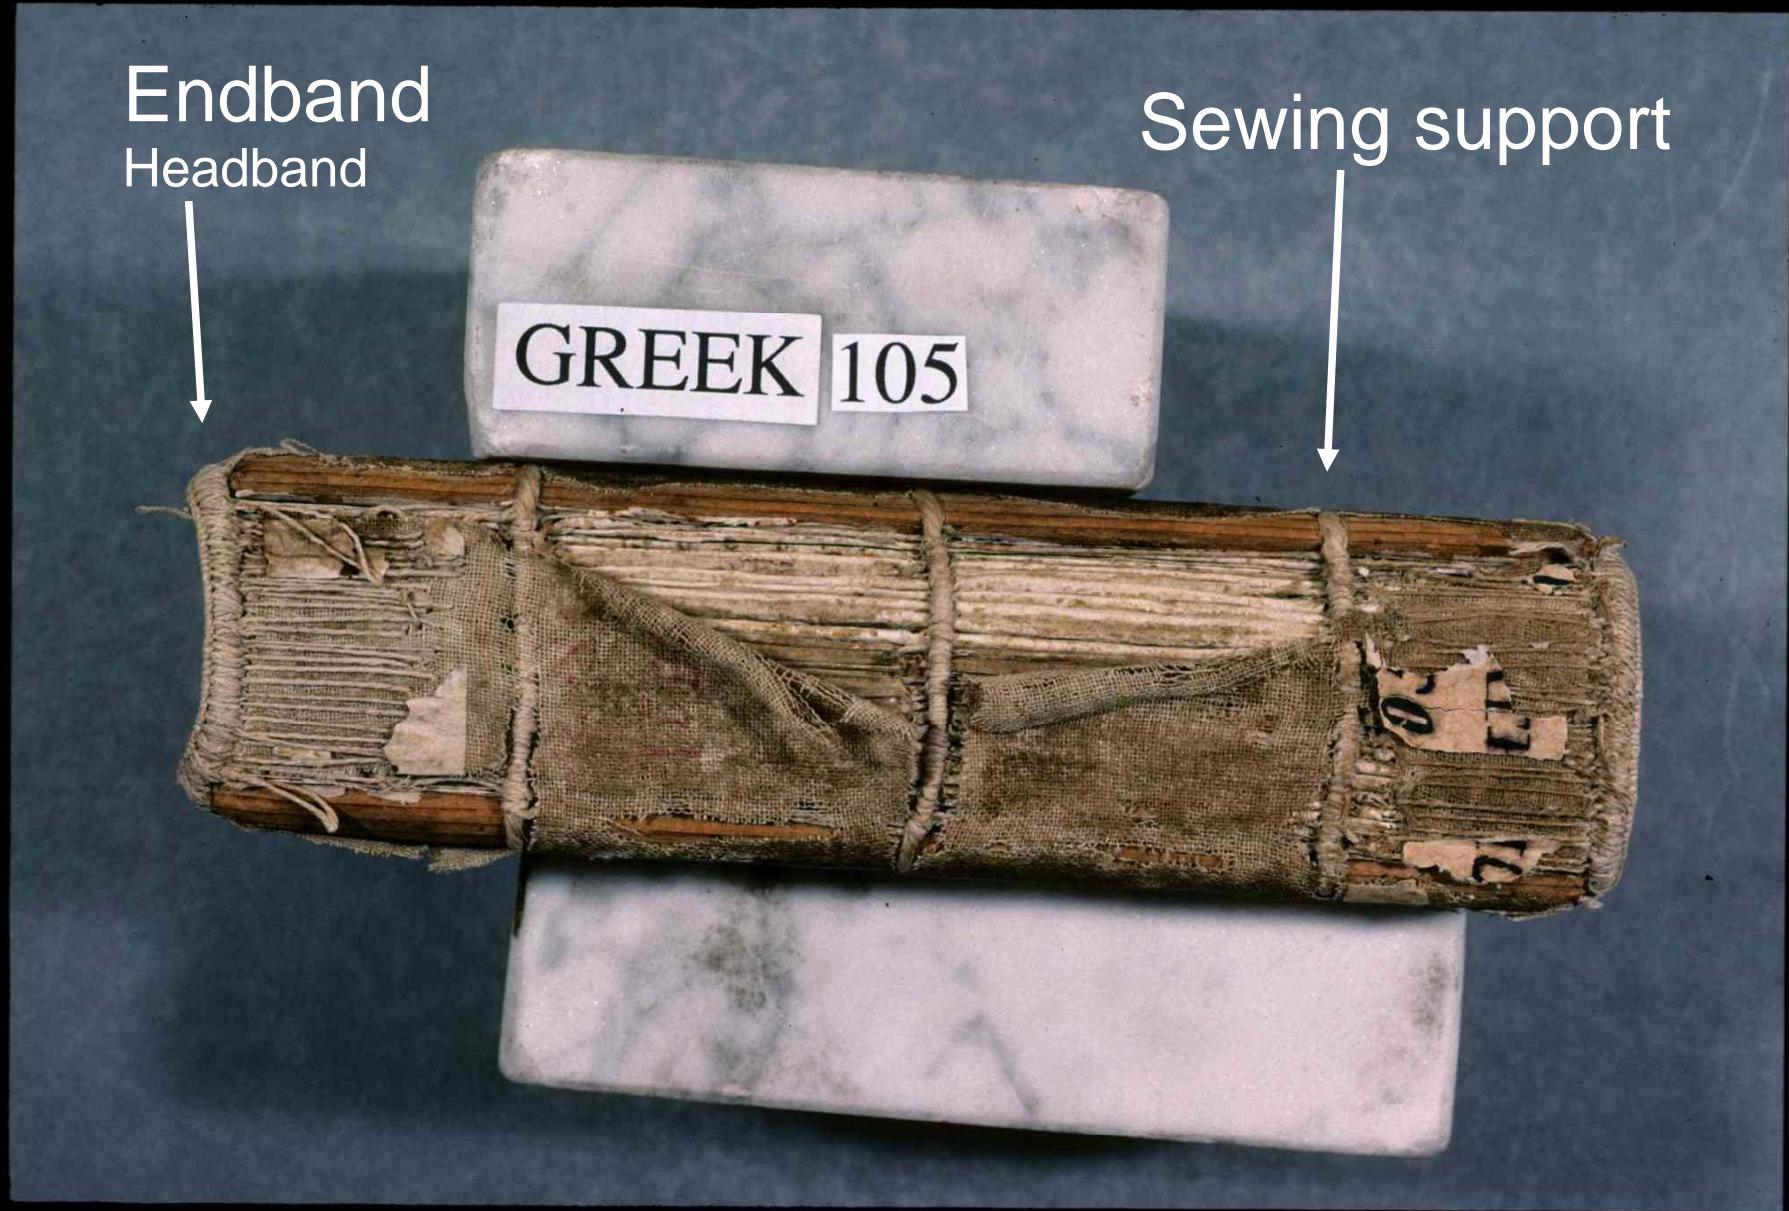

Where to include:

- **Wandvase** Duden-online: [als Schmuck] an die Wand zu hängende Vase
- **Nierentisch** Duden-online: niedriger Tisch mit nierenförmiger Platte
