## Preface

- This presentation deals with aspects of linking that are inherent in CONA (an implementation of CDWA / CCO) and the Iconography Authority (IA), an implementation of the “Subject Authority” of CDWA / CCO

## Preface

- CONA is currently available in an online search interface

**Search Tips**  
For the current pilot release of CONA, we advise that browsing the CONA hierarchies will likely provide more gratifying results than searching, since the number of records included in CONA is as yet limited. The total will grow through contributions over time; data is added and updated every two weeks. However, if you wish, you may now also search by title/name or by ID. You may use AND and OR (in upper case). Wildcard is the asterisk (\*); right truncation only. You may also search for keywords in the Note field. Please contact us at [vocab@getty.edu](mailto:vocab@getty.edu) if your institution wishes to contribute to CONA. As with the AAT, TGN, and ULAN, CONA grows through contributions from the user community.

- Search interface is cursory, by title, subject\_id and desc. note;
- Will add fields to search by work type, creator, materials, dates, location, subject

- Analysis for CONA mapping to CIDOC CRM.  
For the status of CONA and the IA, check the Getty Vocabulary Program pages

## CONA in context

[www.getty.edu/research/tools/vocabularies/index.html](http://www.getty.edu/research/tools/vocabularies/index.html)

- *Art & Architecture Thesaurus* ®  
AAT = information for generic concepts, terms, relationships, other data (e.g., *watercolors*, 玉器, *amphora*, *asa-no-ha-toji*)

- *Getty Thesaurus of Geographic Names* ®  
TGN = information for administrative, physical places, names, relationships, historical information, coordinates, for current and ancient places (e.g., *Diospolis*, *Acalán*, *Ottoman Empire*, *Ganges River*)

- *Union List of Artist Names* ®  
ULAN = information for people, corporate bodies, names, biography, relationships, other data for artists, patrons, rulers, sitters (e.g., *Christopher Wren*, *Altobelli & Molins*, *Anp'yŏng Taegun*)

- [Cultural Objects Name Authority] ®  
CONA = information for works of art and architecture, titles/names, relationships, physical characteristics, subject depicted (e.g., *Mona Lisa*, *Livre de la Chasse*, *Chayasomesvara Temple*)

- [Getty Iconography Authority]  
IA = information for iconographical narratives, religious or fictional characters, historical events, literary works and performing arts, including names, relationships, links to Getty vocabs, other data (e.g., *Adoration of the Magi*, *Zeus*, *French Revolution*, *Der Ring des Nibelungen*, *Reclining Buddha*)

- CONA contains or links information about visual works from multiple sources
- Is linked to the AAT, TGN, ULAN, IA
- Each record in CONA, as in AAT, TGN, ULAN, IA is identified by a unique, persistent numeric ID; terms, most other info also identified by IDs = linking

## CONA, the Cultural Objects Name Authority®

Titles, attributions, styles, locations, other information about movable works (paintings, sculpture, prints, drawings, photographs, ceramics, groups of works, etc.) and architecture (buildings, bridges, built complexes, etc.) (e.g., *Hagia Sophia*, *Mona Lisa*, *Fantastic Landscape with a Pavilion*).

- CONA is a resource containing and linking to metadata about works
- Built works, movable works, conceptual (multiples) works, visual surrogates, unknown named works (e.g., historical sales and inventories)
- CONA includes information for works executed or only designed (e.g., a built work for which only design drawings exist); extant or destroyed, ephemeral, lost
- CONA grows through contributions from repositories of art, the expert cataloging community, and the scholarly community
- Through rich metadata and links, it is hoped that CONA will provide a powerful conduit for research and discovery for digital art history and related disciplines

## What is CONA?

### Enabling research and discovery in art history

#### A resource for a new linked, open research environment

- CONA compiles titles, attributions, depicted subjects, and other metadata about works of art, architecture, and cultural heritage, both extant and historical
- Metadata is gathered and linked from museum collections, special collections, archives, libraries, scholarly research, and many other sources = multiple sources for each work
- CONA is multicultural and multilingual
- CONA is linked to the AAT, TGN, ULAN, and the IA; CONA is linked to images
- CONA is an implementation of Categories for the Description of Works of Art (CDWA) and Cataloging Cultural Objects (CCO), both products of consensus of experts in art history, museums, libraries, special collections, archives, documentation projects – therefore represents well the needs and best practice of the community

[www.getty.edu/research/publications/electronic\\_publications/cdwa/](http://www.getty.edu/research/publications/electronic_publications/cdwa/)

## What is CONA?

### Enabling research and discovery in art history

A resource for a new linked, open research environment

- CONA can provide records for lost and destroyed works, ephemeral works, works planned but not executed
- CONA provides unique, persistent numeric identifiers for the sum of data about the work and all of its associated information, allowing disambiguation between similar works and authoritative information about the work in linked environment
- CONA is considered authoritative because all information is derived from authoritative sources and contributors which are cited

## What is a minimum record for CONA contribution?

- CONA fields comprise a subset of the CDWA, including **core** fields and others
- Instructions are available to contributors for defaults when **core** data is unavailable
- Other values, such as the CONA ID, are supplied by CONA

## CONA combines information about the work from different sources

### How does CONA differ from a simple combination or linking of information from the separate repositories?

- Provides indexing with the Getty vocabularies
- Data is normalized and more consistently fielded
- Subject indexing and descriptive titles are important value added
- Represents the information known about the work, not only the opinion of the repository
- Not only information for works in repositories, but also the following:
  - built works*
  - lost works, ephemeral works*
  - works never built*
  - reconstructed works*
  - multiples (conceptual works)*
- Links out to the open environment

 Descriptive Note: This drawing was exhibited with other entries the Concours de l'An II, despite having been submitted after the deadline had passed. In this allegorical work illustrating Jacobin ideals through symbolic figures, Vien chose to depict a procession from classical antiquity and imbue it with revolutionary ideas. Wanting to start work on a companion piece, the artist eventually decided to withdraw this drawing before the jury had reached its decision.

## CONA links work records to the Getty vocabularies

- Since CONA is linked to the other vocabularies, it is necessary to match incoming values to the AAT, ULAN, TGN, and IA when loaded
- The CVA/Processor was developed in-house for editors to use where auto-links are not possible
- Such a tool should be available for contributors

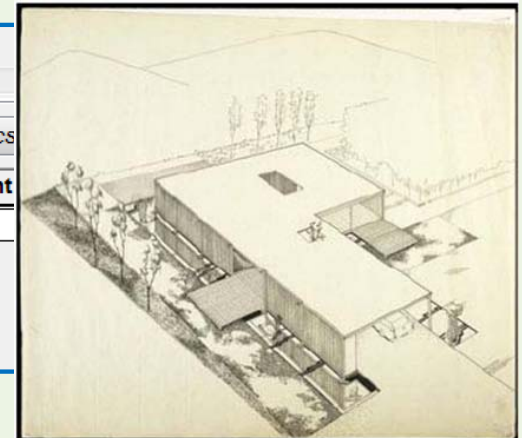

- Requires tools to automatically map contributors' data to and link to vocabularies
- Goal = 80% loaded without editor intervention
- Will be required to load CONA data

## Works records are linked to each other

### Hierarchical relationship

- Traditional archival relationships
- Whole/part relationships for groups, subgroups, items
- CONA can accommodate links that a repository would maintain

CONA ID 700008517 Classification: prints and drawings  
 Work Type: etching  
 Title: *The Dissipation*;  
 Creator: Jacques Callot (French, 1592-1635)  
 Mat & Tech: etching  
 Source: Lieure, no. 1407  
 State 2 of 3  
 Current Location: National Gallery of Art (Washington, DC); R.L. Baumfeld Collection; 1969.15.833.

## Hierarchical relationship: Scope of CONA: Major subdivisions of the hierarchy

### Built Works

- Structures or parts of structures that are the result of conscious construction, are of practical use, are relatively stable and permanent, and are of a size and scale appropriate for—but not limited to—habitable buildings

### Movable Works

- The visual arts and other cultural works that are of the type collected by art museums and special collections, or by an ethnographic, anthropological, or other museum, or owned by a private collector; Examples include paintings, sculpture, prints, drawings, manuscripts, photographs, ceramics, textiles, furniture, and other visual media such as frescoes and architectural sculpture, performance art, archaeological artifacts, and various functional objects that are from the realm of material culture and of the type collected by museums

### Visual Surrogates

- Images and three-dimensional works intended to be surrogates for the works depicted, for example *study photographs*; does not include works considered themselves works of art (e.g., Julius Shulman)

### Conceptual Works

- Multiples: records for series as a concept, conceptual records for multiples (made from same plate, negative, mold, etc.), and other similar records; physical works, such as prints that belong to a series, may be linked to conceptual record for the series (similar to FRBR “work”)

### Unidentified Named Works

- Works described in archival inventories or other sources, but their identity is not established (e.g., Provenance Index inventories)

## Works records are linked to each other

CONA could virtually reunite disassembled or lost  
works, or describe works conceived but not  
executed

- Example of a destroyed work, surviving only in ruins
- Scholarly reconstructions, early post-conquest depictions could be linked to the record for the original temple (as Depicted Subjects or Assoc Rels)

# When to make relationships?

## Only direct relationships

- Do not make Associative or Hierarchical Relationships unless the relationship is direct
- For example, just because two works are by the same artist and have the same subject, they should not be linked directly to each other
- They will be retrieved together through Creator and Depicted Subject

## Works records are linked to each other

### Hierarchical relationship

- Multiples: Works created from same blocks, plate, negative, molds
- Example: woodcut prints made from the same blocks

**CONA ID** 700000091

**Classification** prints

**Work Type:** woodcut (print)

**Title** The Great Wave

Kanagawa oki nami ura

Under the Wave off Kanagawa

**Creator** Katsushika Hokusai (Japanese, 1760–1849)

**Creation Date** : ca. 1830/1832

**General Subject** seascapes

**Specific** | Kanagawa | sea | wave | Mount Fuji

**Current Location** Metropolitan Museum of Art (New York, New York); JP1847

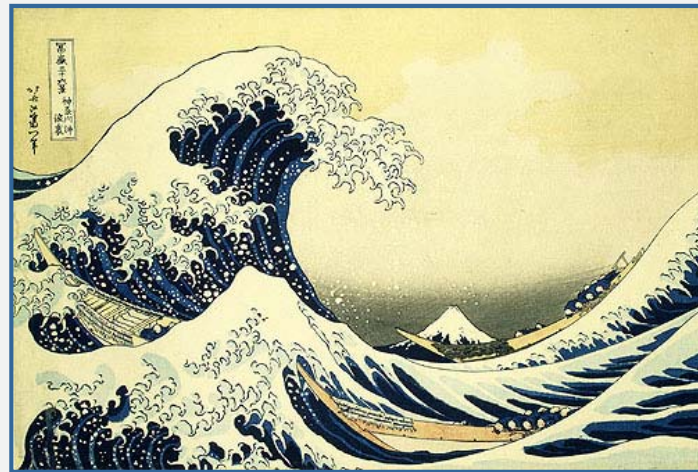

**Dimensions** diameter: 8 1/4 inches (21 cm)

**Mat & Tech:** polychrome woodblock print; ink and color on paper

**Style** Edo

**Relationships:** from the series Thirty-six Views of Mount Fuji (Fugaku sanjūrokkei)

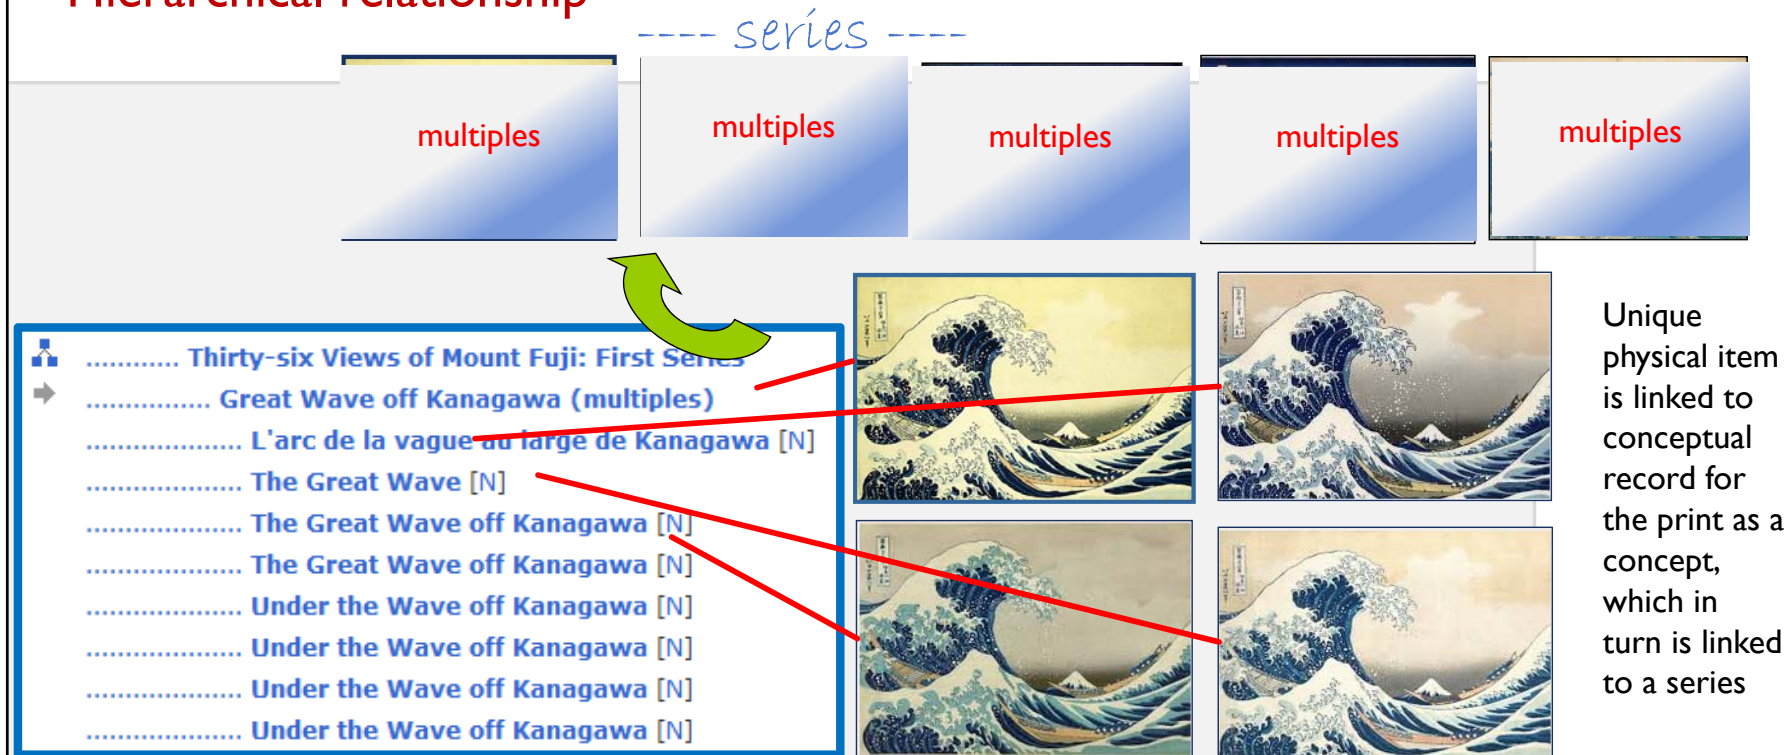

- Here is a record for one item, a woodcut in the Met, printed from blocks by Hokusai
- Other items were also printed from the same blocks, making this work an example of a “multiple”
- How to record multiples? See next slide.

## Works records are linked to each other

### Hierarchical relationship

- Non-preferred Whole/Part for a series and items belonging to conceptual series
- Conceptual multiples relationship (like FRBR “Work” (– not CDWA “work”))

## Works records are linked to each other

### Hierarchical relationship

- Multiples may be three-dimensional objects too, same model, cast from same mold, etc.
- Non-preferred parent of these movable works is a conceptual multiples work
- Movable works as instances of Multiples = “Conceptual Work”

## Various other links: Sources, contributors, media

- CONA includes links to images of the works (persistent URLs), published sources, etc.
- It thus may provide metadata to access and link to images in the linked, open world

## CONA: Linking to Subjects Depicted

### CONA could fill a void, linking depicted subjects

- CONA can provide access by depicted subjects
  - Currently, a huge void in work records is subject access
- ❑ What do end-users want? Subject access is among their top requirements
  - ❑ Whereas libraries have a tradition of cataloging the subjects of works
  - ❑ Many art museums typically do not index subject matter depicted in / represented by works
    - [sitters, places, events, iconographical themes, dedication of certain buildings, etc.]
    - In a survey conducted of American art museums' data, of the core fields (agreed by consensus in CDWA, CCO, etc.), all museums included all core fields except the depicted subject [survey by OCLC (*Online Computer Library Center, a nonprofit computer library service and research organization*); core fields per CDWA and CCO (Categories for the Description of Works of Art)]
    - How to provide indexing? Automated parsing of titles and notes; proofed by hand
    - Too many irrelevant or wrong subject links are as bad as – or worse – than no indexing of subjects

### Indexing the depicted subject of a Work Record

## General Subject and Specific Subject

- **General Subject:** Required to include one general subject
- Controlled by an extensible list, not linked to Getty vocabularies
- Purpose is to place the depicted subject in a broad category; count nouns are plural
- **Specific Subject:** Optional but highly recommended
- Add terms to describe subject as specifically as possible  
However, index only the most important characteristics or topics
- Controlled by AAT, TGN, ULAN, CONA, and the Getty IA
- Purpose is to index subject and allow retrieval using Getty vocabularies
- May repeat more specific concept as in General Subject, but more specifically if possible
- Avoid repeating the Work Type
- Contributors may instead link Iconclass, LOC Authorities, etc., if these terms are already incorporated in their local data

## Choosing the Hierarchical Context (Parent)

### main subdivision

- **Literature**

The Literature facet includes literary works that do not fit more conveniently in Religion, Mythology, and Legend facet or as history. As of this writing, the Literature facet is divided into the following divisions.

CONA ID:  
700009129  
Work Type: painting  
Title: Don Quixote  
Creator:  
Pablo Picasso  
Date: 1955  
Location: lost

- **Literary characters:** Named characters from literary, musical, and dramatic works. E.g., *Don Quixote* (Cervantes, *Don Quixote de la Mancha*) and *Queen of the Night* (Mozart, *Magic Flute*). Through associative relationships, link the character to the literary work in Related iconographic Subject.
- For religious and mythological characters, place them in the Religion and Mythology facet. Historical characters should be included in ULAN.
- **Literary fictional places:** Included are physical features, administrative geographic places, and fictional built works. An example is *Middlemarch (England)*, the fictional place in the setting for George Eliot's 1872 novel *Middlemarch*. Through associative relationships, link the place to the literary work in Related iconographic Subject.
- For religious and mythological places, place them in the Religion, Mythology, and Legend facet. Real current or historical places should be placed in TGN.

- **Literary themes or narratives:** Included are themes and narratives. An example is the tale of the lovers *Angelica and Medoro*, from *Orlando Furioso* by Ariosto. Through associative relationships, link the theme or narrative to the literary work in Related iconographic Subject.
- For religious and mythological narratives, place them in the Religion, Mythology, and Legend facet.
- **Named written or performed works:** Included are named written or performed works. Examples include *The Odyssey* by Homer; *De arithmetica* by Boethius; *Fedra incoronata*, a choreographic work; and *The Bible* as a literary work. Link authors and other creators of the literary work in ULAN through Related People and Corporate Bodies.

main subdivision

- **Named Events**

In the Named Events facet are included events having a proper name, including historical events, named natural disasters, and exhibitions. For generic terms referring to events, use the AAT rather than the IA.

- **Prehistoric events:** Includes named events related to human activity in the prehistoric era. Events placed here may also be linked to the hierarchical level for the geographic region where they occurred. For example, Settlement of the Americas may be linked to North and South America history, but also linked here as a Prehistoric event. For events occurring prior to human activity, place them under Named natural events facets.
- **Ancient history:** Includes named events related to human activity taking place in ancient history, in any location but particularly those that are unrelated to modern political-geographic designations. For localized ancient events, you may instead place them under the appropriate modern political-geographic subdivision elsewhere in the IA hierarchy.
- **North and South American history:** Includes named events taking place in North, South, or Central America. The subdivision is further divided, for example United States history and Pre-Columbian history.

- **African history:** Includes named events taking place in Africa. The subdivision is further divided by nation or area.
- **Asian history:** Includes named events taking place in Asia. The subdivision is further divided by nation or area; for example, Chinese history and Indian history.
- **European history:** Includes named events taking place in Europe. The subdivision is further divided by nation or area.
- **Global historical events:** Includes named events related to human activity and taking place over several nations. An example is *World War II*. For events that took place in one area, but should have a part/whole relationship to a global event, make the preferred parent the specific location and a second parent the global event (e.g., *Battle of Maastricht* took place in the Netherlands, but is part of the global event *World War II*). For ancient events taking place over multiple areas, prefer Prehistoric events or Ancient events facets.

For named events that primarily affect nature, even if created by humans, place the concept in the Named natural events facet.

- **Named natural events:** Includes named events that were natural in origin, or that affect nature. An example is *the Eruption of Krakatoa (1883, Dutch East Indies)*. For generic terms referring to events or processes that are natural or that affect nature, such as global warming, use the AAT.
- **Named exhibitions:** Includes exhibitions that have proper names and where art and other works of cultural heritage were exhibited. The exhibition may be indexed as a generic event exhibition, with location and date applicable to the Work in the Location area of a Work record. The proper name of the exhibition should be linked in the Specific Subject area of the Work record.
- For exhibitions that recur, if the location and coverage of the exhibition is basically the same every year, do not necessarily make a separate entry for every year in which the exhibition took place (e.g., *International Art Exhibition (Venice, Italy)*). On the other hand, if the exhibition occurs less frequently and is located in a different place each time, often with a different focus, you may create a separate record for each exhibition (e.g., *French Industrial Exposition (Paris, 1844)*).
- **NB: Recurring holidays and seasons** are recorded in the AAT, not in the IA.

main subdivision

- **Religion, Mythology, and Legend**

The Religion, Mythology, and Legend facet includes themes, narratives, characters, and places associated with the iconography of religion, mythology, and legend. Historical events are included in the Named Events facet.

- Concepts in this facet are numerous, given the rich heritage of depictions in the history of art. As of this writing, the facet is further divided into the following subdivisions.
- **Prehistoric iconography:** Includes named iconographic subjects dating to prehistory. It may be divided into subdivisions representing regions or cultures.
- **Egyptian iconography:** Includes named iconographic subjects from the ancient Egyptian tradition. It is further divided into subdivisions Egyptian allegory and symbolism, Egyptian characters, Egyptian fictional places, Egyptian narratives.
- **Christian iconography:** Includes named iconographic subjects from the Christian tradition. It is further divided into various subdivisions, including Christian allegory and symbolism, Christian characters, Christian fictional places, New Testament narratives, and Other Christian narratives.

- **Greek and Roman iconography:** Includes named iconographic subjects from the ancient Greek and Roman tradition. It is further divided into subdivisions Greek and Roman allegory and symbolism, Greek and Roman characters, Greek and Roman fictional places, Greek and Roman narratives.
- **Hindu iconography:** Includes named iconographic subjects from Hindu. It is further divided into subdivisions Hindu allegory and symbolism, Hindu characters, Hindu fictional places, Hindu narratives.
- **Buddhist iconography:** Includes named iconographic subjects from Buddhist traditions. It is further divided into subdivisions Buddhist allegory and symbolism, Buddhist characters, Buddhist fictional places, Buddhist narratives.
- **Islamic iconography:** Includes named iconographic subjects from Islamic tradition.
- **Old Testament iconography:** Includes iconography from the Hebrew Bible and first section of the Christian Bible. It is further divided into subdivisions Old Testament allegory and symbolism, Old Testament characters, Old Testament fictional places, Old Testament narratives.
- **Norse iconography:** Includes mythology of the North Germanic people from Norse paganism and into the Scandinavian folklore of the modern period. It is further divided into subdivisions Norse allegory and symbolism, Norse characters, Norse fictional places, Norse narratives.

Example of further divisions under subdivisions

    - Ketumati (Buddhist legendary place)
  - **Buddhist narratives**
    - Buddha in Jetavana preaching (Buddhist narrative)
    - Contest between Sariputra and Raudraksa (Buddhist narrative)
    - Miraculous image of Liangzhou (Buddhist narrative)

- **Pacific Islander iconography:** Includes iconography of the traditional cultures of the Pacific Islands. It is further divided into subdivisions Pacific Islander allegory and symbolism, Pacific Islander characters, Pacific Islander fictional places, Pacific Islander narratives.
- **Persian iconography:** Includes the iconography of various belief systems of the area of ancient Persia, particularly the iconography of Proto-Indo-Iranian religion and Zoroastrianism, but also including Zurvanism, Mandaism, and others. It is further divided into subdivisions Persian allegory and symbolism, Persian characters, Persian fictional places, Persian narratives.
- **Pre-Columbian iconography:** Includes the iconography of various belief systems of the Pre-Columbian Americas. As of this writing, it is further divided into Maya and Aztec iconography and Southwestern Native American iconography, each of which has further subdivisions by allegory and symbolism, characters, fictional places, and narratives.
- **Taoist iconography:** Includes the iconography of Taoism. It may be further subdivided.
- **Tribal African iconography:** Includes the iconography of African traditional religions. It may be further subdivided.

main subdivision

- **Miscellaneous Allegory and Symbolism**

This facet includes named allegorical and symbolic subjects that do not fit into another facet. For generic terms referring to allegory or symbolism, use the AAT rather than the IA.

- **Miscellaneous Characters**

This facet includes named characters that are subjects but do not fit into another facet. An example is the allegorical portrayal using human figures to represent the *Four Winds*.

- **Miscellaneous Fictional Places**

This facet includes named fictional places that do not fit into History, Religion, and Legend facet or any other facet.

- **Miscellaneous Themes and Narratives**

This facet includes named themes and narratives that do not fit into the Literature facet, the Named Events facet, or Religion, Mythology, or the Legend facet.

## Iconography Name Required

- **Iconography Name:** The names used to refer to the subject, including the preferred form of the name, which is the form most commonly found in published sources. It also includes synonyms and variant names for the subject. Instructions are included for how to construct a name when none is found in sources.

# How to determine if the names are synonyms

- **Issue: Synonyms?**  
When should a separate IA record be made rather than combining names as synonyms in one record?
- For example, are *First Battle of Bull Run* and *First Battle of Manassas* synonyms?
- Yes. They are variant names referring to the very same battle in the U.S. Civil War (North and South named battles differently)

# How to determine if the names are synonyms

- **Issue: Synonyms?** When should a separate IA record be made rather than combining names as synonyms in one record?
- For example, are *Aphrodite* and *Venus* synonyms?
- No. They each have their own history, although Roman Venus adopted much of Greek Aphrodite's legend
- Separate IA records, linked through associative relationships

## Link to Iconclass

- IA and Iconclass are not mutually exclusive; they are different resources used for different purposes; are linked and can be used together
- IA requires a brief name for the concept, not a long descriptive phrase
- Source may include terms that belong in the AAT or another authority rather than the IA
- **Example:** Iconclass entries often include long phrases rather than names
- Many terms in Iconclass, such as the generic words *angels* and *saints* are recorded in the AAT, not in the IA
- Long descriptive phrases such as these, which are not a named subject, are out of scope for the IA

## Link to LOC authorities

- **Example:** Library of Congress Authorities
- Topics and characters may include both real people and fictional or mythological characters
- Take care to place them in the correct authority, either ULAN or the IA
- Often LOC Authorities include names in multiple languages that are appropriately included in the IA
- The language is typically not listed; do not guess; leave Language field blank
- Include the LOC control number in the Page field so that the IA may be linked
- Include Permalink when there is one

## Qualifier / Descriptive Phrase

- **Characters:** For human or animal characters, use the religious, mythological, literary, or other context, also repeating the role/attribute that has been linked from the AAT Relationships

### Examples

Anubis (Egyptian, diety)

Beatrice (literary character, Dante's Divine Comedy)

- **Fictional Places:** Include geographical or cultural context, and brief description of the nature of the place

### Example

Elysium (Greek, place of afterlife)

## Related iconographic Subject: IA to IA

- **When to link the IA subject to another IA subject**
- Link one IA subject to another IA subject when the relationship is direct and important, but not hierarchical
- Link only subjects for which the relationship is constant or usual
- Do not link subjects that are only occasionally related in depictions
- Link subjects that may be confused with each other or have overlapping meaning as *distinguished from* or *meaning/usage overlaps with* or another appropriate relationship type

## Related iconographic Subject: IA to IA

- Link one IA subject to another IA subject when the relationship is direct and important, but not hierarchical
- Link only subjects for which the relationship is constant or usual
- Do not link subjects that are only occasionally related in depictions
- Link subjects that may be confused with each other or have overlapping meaning as *distinguished from* or *meaning/usage overlaps with* or another appropriate relationship type

## Related iconographic Subject: IA to IA

- **When to link the IA subject to another IA subject**
- **Characters linked to narratives or literary works**  
For fictional characters, link them to records for the narrative or literary work to which they belong  
For example, the magus *Balthasar* (*Three Magi, Christian iconography*) is linked to the narrative *Adoration of the Magi* (*Christian iconography*) as an actor
- **Characters linked to each other**  
If characters are related to each other, link them  
For example, *Oedipus* (*Greek and Roman character*) may be linked to his daughter, *Antigone*

## Related iconographic Subject: IA to IA

- **When to link the IA subject to another IA subject**
- **Narratives and events linked to each other**  
If two narratives or events are directly related to each other, but the relationship is not hierarchical, link them here through associative relationships
- **Fictional places linked**  
If a fictional place is related to a narrative or character, link them
- **Allegory and symbolism linked**  
If an allegory or symbolic subject is directly linked to a narrative, fictional place, or character, link them

## Generic Related Concept: IA to AAT

- **Generic Related Concept:** Information about a generic concept related to the subject at hand, including roles or other terms that characterize significant aspects of the iconographic subject.
- The goal of indexing generic-concept aspects of the subject is to allow access to the topic by characteristics other than name
- For example, the role of Balthasar is *king*; the subject *Ganesh* could be indexed by terms indicating who Ganesh is, what he symbolizes, and to what he is related: *Hinduism, deity, good fortune, elephant, strength, ritual circumambulation*

# Indexing the Subject Depicted

## How to index subject of the work at hand

- Subject of the work at hand  
(vs. subject as a topic as represented in the Iconography Authority)

- **Issue:** In the Work record, do you need to include specific topics related to the subject, if those specific topics are already part of the authority record?

- Recommendation: Yes. For the work at hand, index those aspects of the subject that are apparent or important
- Particularly where those terms represent aspects of the subject that are unusual or particular for the work at hand

Iconography Id: 1000083 Iconography Parent: 1000084

Iconography Type: Religion/Mythology

Descriptive Note: Episode in the Life of Christ in which the three magi travel from the East to worship the newborn Jesus Christ. The magi are represented by three kings, shepherds, or animals.

Type	Name
D	Adoration of the Magi
UF	Adoraton of the Kings
UF	Adoration of the Three Kings
UF	Adoration of the Wise Men
D	Adorazione dei Magi
D	Anbetung der Könige

6V UF Anbetung des Jesuskindes durch die Heiligen Drei

- **Issue:** Not all aspects of a subject topic are necessarily portrayed in every work having that subject
- E.g., Adoration of the Magi, cast of characters, animals, allegorical themes

Class.: Britain, Europe and Prehistory

Work Type: plaque

Title: Ivory plaque with the Adoration of the Christ Child  
Current Location: British Museum (London, England); 1904,0702.1; M&ME 1904,7-2,1

Creation Location: Eastern Mediterranean region  
Dimensions: 21.700 x 12.400 x 1.200 cm; from the centre of a 5-part diptych

Date: Early Byzantine, early 6th century CE  
Mat & Tech: relief panel

Desc. Note: This panel presents a solemn high-relief image of the Adoration of Christ. The Virgin Mary is shown with wide staring eyes and larger in scale than the other figures, dominating the composition. The Christ child, held between her legs, makes a gesture of blessing. Beside the Virgin are an angel holding a cross-staff and the three Magi (Wise Men) dressed in Oriental costume – tight trousers, short tunics and Phrygian caps. They present their gifts as sacred offerings with veiled hands.

In brief:

- If you know it, include it
- But do not index specific subject data unless you have authoritative sources for the information
- Better to be general and correct rather than specific and incorrect

- Balthasar, Gaspar, Melchior are characters in Western art, but not in all Christian art
- Syrian Christians' names for the Magi are Larvandad, Gushnasaph, and Hormisdas
- Are you sure of which characters are intended here?
- If not, better to index *Adoration of the Magi* as a Specific Subject
- Do not name the Magi unless you are certain, based on authoritative sources
